1. INTRODUCTION AND RATIONALE

1.1 Project Background

The Government of Indonesia is implementing the Indonesia Mass Transit (MASTRAN) Project to address mobility needs and improve livability in Indonesia's major urban areas. The project includes institutional and capacity development and support for the development of a national assistance program for mass transit in Indonesian cities, and investment in road-based mass transit systems within the Bandung Basin Metropolitan Area (BBMA) and Medan Metropolitan Area (Mebidang).

The development of this mass public transportation system may require land acquisition, potentially affecting local communities directly or indirectly. Generally, land is needed for road corridors, depots, and end stations (terminus), bus stops (in forms of shelters or poles). The planned BBMA BRT On-Corridor will pass through 12 sub-districts and 32 villages in Bandung City. Meanwhile, the 26 terminus are distributed across five regions: Bandung City (17), Bandung Regency (4), West Bandung Regency (3), Sumedang Regency (1), and Cimahi City (1).

Despite being named as 'LARAP', this document serves as land due diligence for risk mitigation and compliance purposes, which will be discussed in the Purpose of Supplementary LARAP. As per MASTRAN Environmental and Social Commitment Plan (ESCP) and the working level agreement between Ministry of Transportation and Bandung City Governments, social impact will be managed by respective local governments.

1.2 Project Components and Original LARAP Scope

1.2.1 Key Project Components

The project comprises several critical infrastructure works funded through the loan, including:

- **Dedicated BRT Corridors**

Approximately 21.7 km of "on-corridor" lanes using existing road networks, reinforced with asphalt and concrete. Most sections feature segregated lanes with physical barriers.

- **Station Infrastructure**

34 on-corridor bus stops/platforms and 25 BRT end-stations or terminals.

- **Feeder Network**

248 off-corridor shelters across five service routes connecting to the main BRT lines.

- **Support Facilities**

7 BRT bus depots, landscaping along corridors, and the construction of pedestrian sidewalks with universal accessibility (disability-inclusive) features.

1.2.2 Scope and Limitations of the Original LARAP

The Original LARAP was submitted to the World Bank on February 10, 2025, and received a Conditional No Objection on March 10, 2025. This initial document was developed in compliance with the MASTRAN Environmental and Social Management Framework (ESMF) and World Bank Environmental and Social Standard 5 (ESS5).

The scope of the **Original LARAP** was limited to the impacts detailed in the table below:

Table 1. The scope of the Original LARAP

Project Component	Responsibility of
21.7 km BRT Corridor	Ministry of Public Works, West Java Province, and Bandung City Gov.
34 On-Corridor Bus Stops	Ministry of Public Works, West Java Province, and Bandung City Gov.
24 Off-Corridor Terminals	Shared across nine government agencies/institutions.
3 Initial Bus Depots	Cicaheum Terminal, South Leuwipanjang, and Rancanumpang (Gedebage).

1.2.3 Exclusions and Scope AdjustmentsN

Following the finalization of the Original LARAP, several adjustments were made to the project footprint based on technical feasibility and design updates:

- The Rancanumpang (Gedebage) location was removed from the project plan due to unsuitable site conditions, such as frequent flooding and road conditions (Depot adjustments).
- Two key locations, Station Hall and Tegallega, were excluded from the original scope because the DED were not yet available at the time of submission (under discussion).
- Impacts related to the Station Hall and Tegallega will be addressed in a separate, dedicated supplementary LARAP for the BBMA project.

1.3 Purpose and scope of the Supplementary LARAP

This supplementary aims to provide Land Acquisition and Resettlement (LARAP) impact screening and due diligence for the BRT Off-Corridor infrastructure previously have not been covered from the Original LARAP scope. Following the formal designation of the direct service routes, this instrument serves as the primary record of land due diligence for the expanded project areas.

1.3.1 Objectives

The primary objectives of this supplement are:

- **As the regulatory compliance** to fulfill the World Bank's "Conditional No Objection" requirement (Annex 1), which stipulated that off-corridor sites be surveyed and documented.
- **Due diligence** to confirm that the construction of the 248 proposed Off-Corridor bus stops does not trigger involuntary resettlement impacts.
- To demonstrate adherence to the World Bank's Environmental and Social Framework (ESF) Standard 5, the MASTRAN ESMF, and the Environmental and Social Commitment Plan (ESCP).

1.3.2 Scope of Work

The scope of this document is specifically focused on the following:

- The identification and mapping of land parcels for the five (5) rationalized direct service routes and their associated 248 bus stop locations. These components are prioritized for the 2026 construction phase.
- This document does not cover the 24 terminus/endpoints, as these were fully addressed and surveyed in the Original LARAP.
- This supplement confirms that there are no changes to the existing policies, entitlement matrix, or compensation provisions established in the Original LARAP. All principles defined in the original instrument remain applicable.

Another impacts, such as traffic, OHS, community health and safety, and others, are covered in other E&S instruments, namely Environmental and Social Impact Assessment (ESIA), traffic management plan, Environmental and Social Management Plan (ESMP), and Contractor-Environmental and Social Management Plan (C-ESMP).

1.4 Determination of Census Location (Location Sampling)

This supplementary LARAP focuses on the impacts associated with the off-corridor infrastructure, specifically the 248 bus stops. Given the varying scales of these facilities—ranging from simple bus poles to medium-scale shelters (it is called 'large shelters' in DED)—a targeted census approach was adopted. Despite what is documented is risk-based sampling, the driving-through exercise was carried out to assess land use and situations along the off-corridor. The principles and the entitlement matrix will apply to all 248 spots along the BRT off-corridor.

1.4.1 Criteria for Selection

The 'sampling' locations were prioritized based on the scale of infrastructure (i.e., shelters rather than poles) and the likelihood of social impact (i.e., spots with existing informal land users). The following criteria were applied:

- The census focuses exclusively on big shelters and small shelters. Locations consisting only of "bus poles" were excluded as they typically involve negligible footprints and no significant impact.

- Sites were selected based on the high likelihood of encountering Project Affected Persons (PAPs), specifically street vendors or informal businesses currently occupying the area.

1.4.2 Sample Size

As per the agreement with the World Bank during the meeting on April 29, 2025 (Annex 2), it was determined that 20 (twenty) sample locations were required to reflect the number of BRT BBMA direct service routes. The selection of these locations (39 sites) was finalized through:

a. PMC recommendations

15 locations were recommended following the meeting on May 23, 2025. These sites were selected based on their strategic importance to the network and high projected passenger volumes.

b. DED social team verification and Expansion

The remaining locations (24) were identified by the BBMA BRT DED social team. This was achieved through secondary survey using satellite imagery (Google Earth) to identify areas with visible asset encroachment or high-density informal activity.

1.4 Methodology

This supplementary LARAP for off-corridor components uses a field survey methodology to collect data on individuals and assets potentially affected at the predetermined sample locations. The methodology used is as follows:

- a. Field survey by transect walk (based on location coordinates) to collect photos and records of existing conditions.
- b. Taking measurements and detailed mapping of the lands affected by the project while recording other assets located on the land.

Since site-specific plans for each of the 248 locations were not yet available at the time of the study, the LARAP DED BBMA Team employed a coordinate-based survey method. By referencing the specific geographic coordinates for each location, the team determined the potential land boundaries "on-site" based on actual land availability. This ensured that the census and inventory of losses accurately reflected the physical constraints of each location while accommodating the space requirements of the assigned typical design.

1.5 Time Schedule

The Land Acquisition and Resettlement Action Plan (LARAP) Study for the BBMA BRT Off - Corridor was conducted for 3 (three) months, starting from May to July 2025. The outline of the activities carried out is as follows:

Table 2. Time Schedule

No.	Activity	April				May				June				July			
		1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4
1	Compiling a file of documents and information related to the off corridor																
2	Coordination to determine LARAP survey mechanism for selection of sample bus stop locations																
3	Selection and sampling of study sites																
4	Preparation and Implementation of the LARAP survey at sample locations																
5	Recapitulation of survey results																
6	Preparation of LARAP off corridor BBMA BRT report																

2. Overview of the BBMA BRT Off-Corridor

2.1 Direct Service Routes and Bus Stops

The BBMA BRT utilize a “Direct Service” route concept, operating both on and off the dedicated lanes. This approach minimizes passenger transfers from feeders to the main lines but requires a high-quality, standardized bus stops along route segments outside the main corridor. The project scope has evolved through several stages of refinement:

Initial Plan	21 direct service routes with 768 bus stops.
2025 Adjustment	Following a demand study, the plan was revised to 18 routes, slightly reducing the off-corridor stops from 747 to 719 (a 4% reduction).
Final Rationalization	To optimize the construction in 2026, a recent proposal further rationalized the off-corridor bus stops, reducing the scope to 5 routes and 248 bus stops. This final configuration has been formally agreed upon by the World Bank and the Project Implementation Unit (PIU).

The distribution of planned bus stop off corridor locations for the planned routes can be seen in the following figure.

Figure 1. Distribution of planned off-corridor BBMA BRT bus stop locations

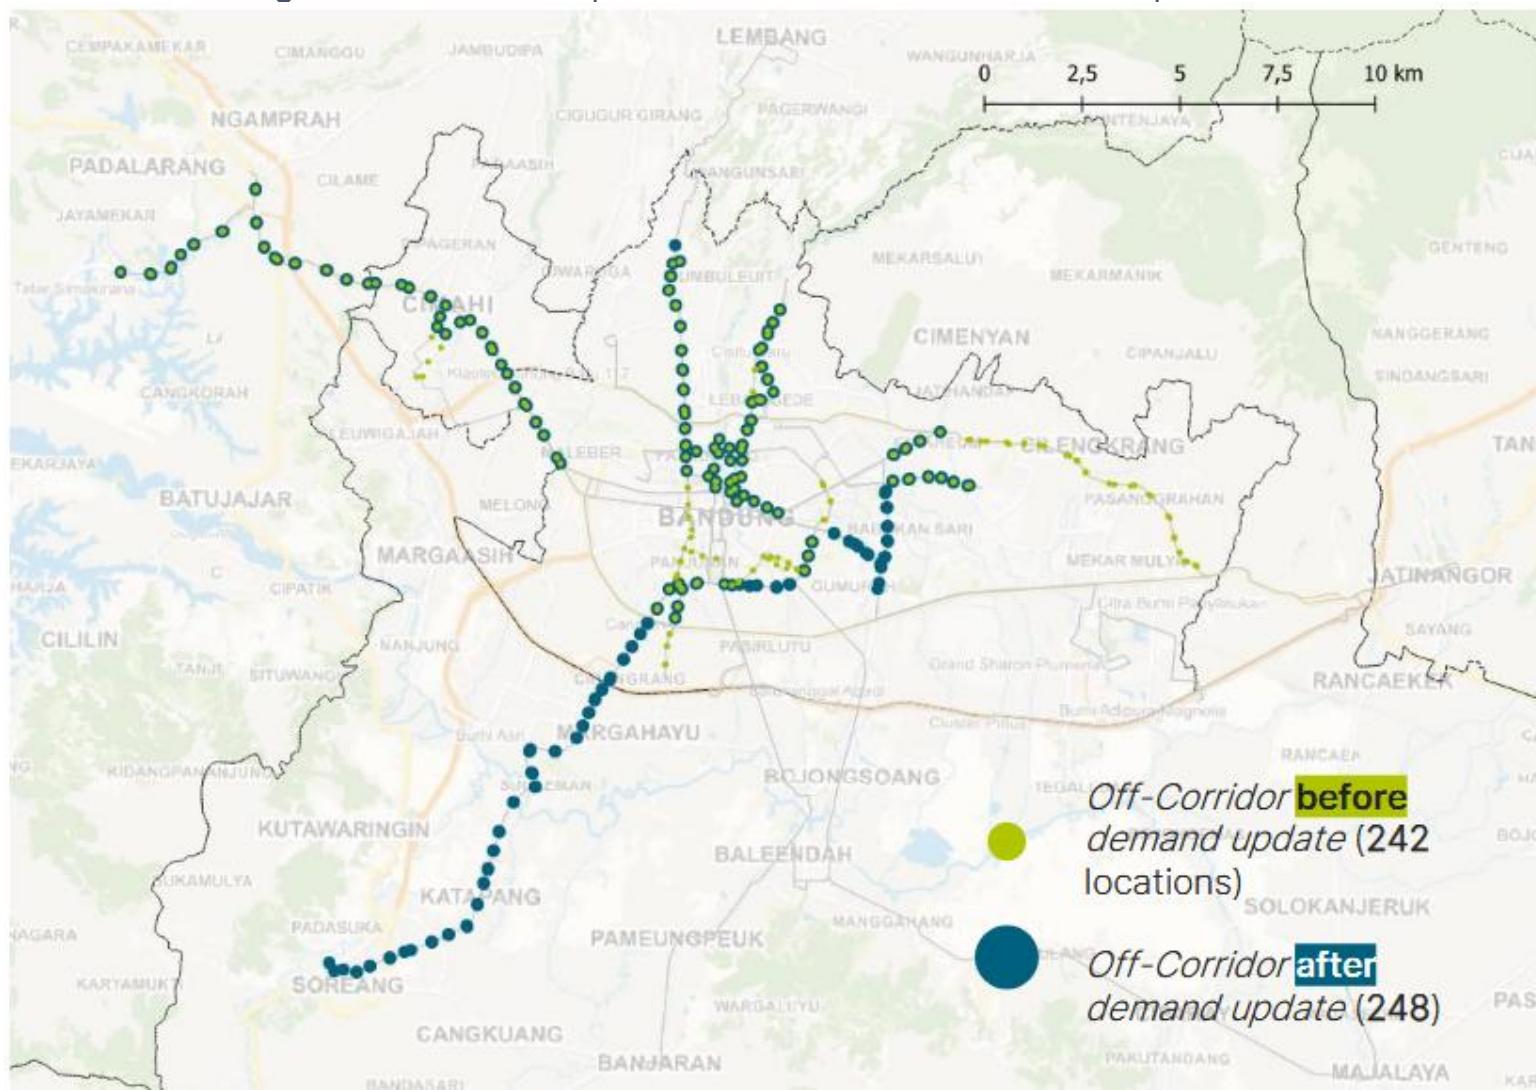

Table 3. BBMA BRT Routes

No	BRT Route Code	Origin - Destination
1	BRT01	Cibiru-Kalapa
2	BRT02	Lembang-Taman Tegallega
3	BRT03	Leuwipanjang-Dipatiukur-Dago
4	BRT04	Elang-Riau
5	BRT05	Ciroyom-Pajajaran-Antapani
6	BRT06	Dago-Leuwipanjang-Cibaduyut
7	BRT07	Padalarang-Alun Alun Bandung
8	BRT08	Cimahi-Cicaheum
9	BRT09	Ledeng-Antapani
10	BRT10	Cicaheum - Kalapa
11	BRT11	Tegalluar-St. Hall
12	BRT12	Soreang-Terminal Tegallega
13	BRT13	Jatinangor-Leuwipanjang-Cibereum
14	BRT14	Majalaya-Baleendah-Leuwipanjang
15	BRT15	Banjaran-Baleendah-BEC
16	BRT16	Sarijadi-Antapani
17	BRT17	Cicaheum - Sarijadi
18	BRT18	Jatinangor-Dipatiukur via Tol

Out of the 18 planned routes in the BBMA BRT network, five (5) have been prioritized for the first phase of construction scheduled for 2026 (Annex 3). The selection of these routes is based on high-demand rankings and established operational performance.

The prioritized routes are categorized as follows:

- **BRT 03, BRT 09, and BRT 10**
This update identified significant passenger volume potential that was not captured in earlier studies, making it a critical addition to the 2026 phase.
- **BRT 07 and BRT 12**
These routes are currently operational within the existing transit system, serving critical corridors with proven demand.

2.2 Bus Stop Types

The Detailed Engineering Design (DED) for the off-corridor bus stops utilizes **typical design specifications** categorized into three types: **Bus Pole**, **Small Shelter**, and **Big Shelter**. Rather than generating unique site plans for each of the 248 individual locations, these standardized designs are applied based on the spatial capacity and service requirements of each site. Consequently, land boundaries and potential impacts were determined during field surveys by overlaying these typical dimensions onto the actual physical conditions at the designated coordinates.

Figure 2. Bus Stop Types

Bus Pole

Dimensions in cm
(L x W x H):
61.5 x 20 x 330

This type requires the smallest land area, primarily occupying vertical space with a minimal base footprint on the existing sidewalk.

Small shelter

Dimensions in cm
(L x W x H):
300 x 200 x 322

This type includes a roofed area and basic seating amenities.

Big shelter

Dimensions in cm
(L x W x H):
622 x 200 x 322

This structure is over 6 meters long, significantly increasing the probability of interaction with existing sidewalk assets.

3. Census Findings

3.1 Overview of Census

The identification of assets and Project Affected Persons (PAPs) was conducted through direct census at the sample locations. This process integrated two critical components:

1. Spatial Verification: Measuring available physical land against the typical DED requirements for Bus Poles, Small Shelters, and Big Shelters.
2. Socio-Economic Inventory: Data collection on informal assets (kiosks, vendors) and public utilities (poles, trees) currently occupying the target coordinates.

3.2 Recapitulation of Survey Findings

Based on the survey of the sample locations, the potential impacts at the sample locations have been categorized into private/individual assets and public/government infrastructure. This classification ensures a clear understanding of the required mitigation measures.

A. Private and Individual Assets (Subject to LARAP)

These assets belong to individuals or informal occupants. Impacts on these items may require specific mitigation measures, compensation or livelihood restoration as defined in the Entitlement Matrix of LARAP. The affected peoples are mobile street vendors, in which an advance notice would be provided before civil work starts. This mobile street vendors will be asked to move to a safe distance from the civil work spot/ area, and remain able to sell/ continue make a living:

- 18 mobile street vendor: individual livelihood activities utilizing public space for trade

B. Local Government and Utility Assets (Subject to Inter-Agency Coordination)

These assets are public property or managed by local government. Impacts on these assets/ public utilities do not require cash compensation but necessitate coordination for relocation or rehabilitation during civil works:

- 20 iron poles
Includes electricity, telephone, and traffic signage managed by relevant agencies (e.g., PLN/ State Electricity Company, Telkom/ State Telco Company, Dishub/ Transport Agency).
- 16 trees (under the local Environment Agency)
Significant greenery within the Right-of-Way (ROW) that may require permits for removal and environmental replacement.
- 3 concrete balls
- 3 pots

- 8 existing bus stops

3.3 Integration of Census Findings into Design Optimization

To ensure compliance with the principle of avoidance and impact minimization, the census results and the Inventory of Losses (IOL) were communicated to the Technical DED Team. This feedback loop allowed for a comparative analysis between the identified asset inventory and the physical land availability at each site.

As a result of this coordination, the following mitigation and design adjustment strategies were developed:

- **Optimization of Sufficient Space (20 Locations)**

In these areas, the available land footprint can accommodate the proposed "Typical Design." Civil works can proceed according to the original plan with minimal disruption to surrounding activities.

- **Design Downsizing for Impact Avoidance (13 Locations)**

These sites were identified as having insufficient space to the original planned bus stops type without impacting private kiosks or street vendor livelihoods. Consequently, it is recommended to reduce the shelter size (e.g., from a Big Shelter to a Small Shelter or a Bus Pole) to maintain a clear pedestrian zone and avoid physical or economic displacement.

- **Strategic Realignment within the Right-of-Way (6 Locations)**

At these locations, while the immediate sidewalk space is restricted, the project will expand the footprint into adjacent municipal park areas. Since these areas remain within the government-owned Right-of-Way (ROW), this adjustment avoids private land acquisition while preserving the existing sidewalk for public use and vendor activities.

The following table provides a comprehensive site-by-site overview of the survey results, the specific assets identified, and the resulting technical recommendations to ensure social safeguards are upheld:

Table 4. Recapitulation of Off-Corridor Bus Stop Census Results

No.	Name ID	Type	Coordinates	BRT Routes	Location	Width (m)		Length (m)		Ownership	Existing Condition	Peoples and Asset Affected							Notes for People and Asset Affected	Notes/Recommendation

LIST OF ANNEXES

Annex 1. Conditional No Objection from the World Bank for the BBMA-BRT LARAP

Annex 2. Minutes of the meeting on April 29, 2025, regarding the World Bank's recommendations on bus stop types and the number of sample locations.

Annex 3. Prioritization of BRT Direct Service Routes (2026 Phase)

**Annex 1: Conditional No Objection from the World Bank for the
BBMA-BRT LARAP document**

Letter no. 049/MASTRAN/V/2025

May 2, 2025

Ms. Ernita Titis Dewi
Director of Road Transportation
Directorate General of Land Transportation (DGLT)
Ministry of Transportation (MOT)
Jl. Merdeka Barat No. 8, Jakarta 10110

Dear Ms. Titis,

***Re: Indonesia-P169548: Indonesia Mass Transit Project, Ln./Cr # IBRD-93400;
Conditional No Objection to the draft Land Acquisition and Resettlement Action Plan (LARAP) BBMA***

We have reviewed the draft Land Acquisition and Resettlement Action Plan for Bandung Basin Metropolitan Area (LARAP BBMA), which was submitted to the Bank in February 2025. We noted that LARAP BBMA is developed based on DED BBMA August 2024 version. The draft noted that off-corridor sites have not been surveyed, thus, a supplementary LARAP for off-corridor BBMA will be prepared and submitted to the World Bank.

Based on the information provided in LARAP BBMA January 2025, the Bank herein provides Conditional No Objection to the draft, subject to the following comments being addressed and followed up:

1. To ensure that budget needs for implementation of LARAP are secured by the subnational governments following the signed WLA.
2. To ensure that livelihood restoration plan is refined and finalized.
3. To ensure that meaningful consultations with affected peoples, in particular vulnerable groups, are continued and documented.
4. To ensure that the Grievance Redress Mechanism (GRM) is accessible to affected peoples, especially vulnerable groups, reliable, and functional.
5. Once the comments in the document are addressed, please disclose the draft on the Ministry of Transportation and Bandung Transport Agency's websites. This action needs to be undertaken to adhere to the requirement on information disclosure under MASTRAN Environmental and Social Management Framework (ESMF).

We encourage the Project Implementation Unit (PIU) to follow up the key action plan above, including to secure the budgetary need for LARAP implementation and develop detailed planning for livelihood restoration, and inform the World Bank to obtain a full No Objection for LARAP BBMA.

Please feel free to contact the World Bank team for any clarifications.

We appreciate your continued cooperation and look forward to our ongoing collaboration.

Yours sincerely,

A handwritten signature in blue ink, appearing to read "Nupur Gupta".

Nupur Gupta
Task Team Leader
World Bank Office, Jakarta

Annex 2. Minutes of the meeting on April 29, 2025, regarding the World Bank's recommendations on bus stop types and the number of sample locations.

Minutes of Meeting

Day/Date : Tuesday, April 29, 2025
 Time : 09.00 - finish
 Location : PT Lenggogeni Office, 6th floor Rifa Building
 Participants : Attendance list attached

Notes:

Bahasa	English
Bpk. Syafrizal <p>Pada bagian pembuka pertemuan ini ini Pak Safrizal menjelaskan tentang garis besar proses tahapan proyek DED BBMA BRT yang sudah dilakukan sejak tahun 2023 sampai sekarang dan termasuk juga penyusunan dokumen ESIA.</p>	Mr. Syafrizal <p>In the opening part of this meeting, Mr. Safrizal explained the outline of the process of the BBMA BRT DED project stages that have been carried out since 2023 until now and also included the preparation of the ESIA document.</p>
Bpk. Ernest <p>Pada bulan Desember sudah dilakukan pembahasan dengan WB dengan Pak Siong, Bu Nabilla mengenai kombinasi antara emisi dan traffic. Hasil reviu dari WB sudah dilakukan perbaikan oleh tim DED dan dikirimkan pada akhir bulan Desember tahun 2025. Karena belum ada Informasi tindaklanjut dari WB, maka pada bulan Februari 2025 tim DED BBMA mengirimkan ulang dokumen tersebut.</p>	Mr. Ernest <p>In December, discussions were held with WB including Mr. Siong, Ms. Nabilla regarding the combination of emissions and traffic. The review results from WB have been revised by the DED team and sent at the end of December 2025. Since there was no follow-up information from WB, in February 2025 the BBMA DED team resubmitted the document.</p>
Bpk. Budiono KS <p>Bergabung dengan WB pada bulan Januari 2025 dan dari hasil reviu ESIA yang dilakukan ternyata banyak hal yang perlu direvisi. Perlu restrukturisasi dokumen ESIA BBMA BRT merujuk kepada dokumen ESIA Mebidang, tanggung jawab tetap di DED BBMA, sbb:</p> <ol style="list-style-type: none"> 1. Chapter 1: Introduction <ul style="list-style-type: none"> • referensi dari Pak Budi 2. Chapter 2: Description of BRT Project and Its Alternatives <ol style="list-style-type: none"> a. Lokasi yang dijelaskan adalah yang sudah pasti saja. <ul style="list-style-type: none"> ➤ Key project component: (i) corridor; (ii) 34 on-corridor bus stops; (iii) 768 off-corridor bus stops; (iv) 2 bus depo and terminal. 	Mr. Budiono KS <p>Joined the WB in January 2025 and from the results of the ESIA review conducted, many aspects need to be revised. It is necessary to restructure the BBMA BRT ESIA document to refer to the Mebidang ESIA document, with responsibility remaining with DED BBMA, as follows:</p> <ol style="list-style-type: none"> 1. Chapter 1: Introduction <ul style="list-style-type: none"> • reference from Mr. Budi 2. Chapter 2: Description of BRT Project and Its Alternatives <ol style="list-style-type: none"> a. The location described is definite only. <ul style="list-style-type: none"> ➤ Key project components: (i) corridor; (ii) 34 on-corridor bus stops; (iii) 768 off-corridor bus stops; (iv) 2 bus depots and terminals.

PKL <ul style="list-style-type: none"> • Langkah Mitigasi: <ul style="list-style-type: none"> – PKL mobile tidak diberikan kompensasi (krn bisa berpindah tempat), tapi diberikan peringatan untuk pindah (misal 3x Peringatan: H- 	<p>Ms. Naimah</p> <p>In the BBMA ESIA, it is necessary to clarify the impact on:</p> <ol style="list-style-type: none"> 1. Angkot Drivers <ul style="list-style-type: none"> • Added summary based on Systra and Redi study. • Mitigation measures: <ul style="list-style-type: none"> – Public campaign and consultation. – Public Reform initiatives, rechecked with PMC/PIU-DGLT / Mr. Aldian. 2. STREET VENDORS <ul style="list-style-type: none"> • Mitigation measures: <ul style="list-style-type: none"> – Mobile street vendors are not compensated (because they can move), but issued warnings to relocate (e.g. 3x warnings: H-90, H-60,

Bahasa	English
<p>90, H-60, H-30), pemberian peringatan harus didokumentasikan.</p> <ul style="list-style-type: none"> – PKL di red zone, dana tali kasih dapat diambil dari incidental budget yg telah dialokasikan oleh PIU/Pemda. <p>3. LARAP BBMA BRT sampai saat ini masih dalam proses reviu Bank Dunia, harusnya dua minggu lalu sudah keluar tetapi sampai saat ini masih berproses. Sebagai catatan disampaikan bahwa untuk LARAP BBMA BRT tidak ada koreksi yang sifatnya major hanya ada beberapa koreksi minor saja. Untuk itu hasil studi LARAP ini sudah bisa ditindaklanjuti dengan mengkomunikasikannya kepada Pemerintah Daerah terkait, karena tidak ada perubahan yang signifikan dari hasil reviu Bank Dunia.</p> <p>4. Mengenai survey Bus Stop Off-Corridor BRT BBMA:</p> <ul style="list-style-type: none"> • Dilakukan 20 sampling lokasi yg merepresentasikan 20 rute Off Corridor BRT BBMA. • Sampling pada lokasi yang akan membuat bangunan (Type Medium atau Big). • Lokasi dengan potensi sebaran jauh, padat penduduk atau memiliki potensi sosial (ada PKL, dll). 	<p>H-30), the provision of warnings must be documented.</p> <ul style="list-style-type: none"> – Street vendors in the red zone, the compensation fund can be taken from the incidental budget that has been allocated by the PIU / Pemda. <p>3. LARAP BBMA BRT is still in the process of World Bank review, it should have been out two weeks ago but it is still in process. For the record, it was stated that for the LARAP BBMA BRT there were no major corrections, only some minor corrections. For this reason, the results of this LARAP study can be followed up by communicating with the relevant Regional Governments, because there are no significant changes from the World Bank review results.</p> <p>4. Regarding the BBMA BRT Off-Corridor Bus Stop survey:</p> <ul style="list-style-type: none"> a. 20 sampling locations representing the 20 Off Corridor BRT BBMA routes should be conducted. b. Sampling at locations that will construct buildings (Type Medium or Big). c. Locations with the potential for remote distribution, densely populated or have social potential (there are street vendors, etc.).
<p>Ibu Ayu dan Ibu Hasnah</p> <ol style="list-style-type: none"> 1. Sudah dilakukan meeting dengan Pemda Bandung (Walikota), Pemda concern dan meminta dilakukan presentasi mengenai aspek lingkungan dan sosial. 2. PMC akan memfasilitasi workshop untuk poin 1. 	<p>Mrs. Ayu and Mrs. Hasnah</p> <ol style="list-style-type: none"> 1. A meeting has been held with the Bandung local government (Mayor), the local government is concerned and requested a presentation regarding environmental and social aspects. 2. PMC will facilitate a workshop for point 1.
